Adan Esparza - UESAdan - ades4326@colorado.edu

Tanmay Meti -Tanmay-Meti - tame4633@colorado.edu

4. Application Name

ContactMi

5. Application Description

ContactMi is like Facebook but with contact information only. Users can enter their contact info on their personal profile page and make themselves visible to other users on the meet person page. Their home pages show a searchable list of users with a search bar and a favorite users display. Each user displayed on the home page shows their contact information and other profile information. Users will use their username and password to login on the login page, and all pages will have a logout button.

This app is different from traditional social media because it is narrowly focused on storing information to contact users in other ways in a streamlined manner. It functions like a yellow book rather than an endorphin trap to make ad revenue like traditional social media.

6. Vision Statement

"Contact Mi envisions a world where every connection brings people closer, fostering meaningful interactions, and enriching lives. Our mission is to provide a platform that seamlessly connects individuals, transcending borders, languages, and cultures to create a global community bound by shared experiences and mutual understanding."

7. Version Control

[Repo](#)

8. Development Methodology

We are using scrum methodology and Kanban boards to track out progress as a team. See the GitHub Kanband board project in the link to the repo above (#7).

We will use a 5-field Kanban board through a GitHub project - Ice Box, Todo, In Progress, Awaiting Review, and Done. We will use a branch for each issue and use linked pull requests to manage the branges and issues together.

We will use Scrum methodology during our in class scrum meetings to plan our work for the week. We will meet with our TA to plan and schedule our future sprints and their workload with the help of our Kanban Board.

9. Communication Plan

Our team plans to stay in touch using Discord and Microsoft Teams for online communication, and we'll also meet in person every Monday to work together on the project.

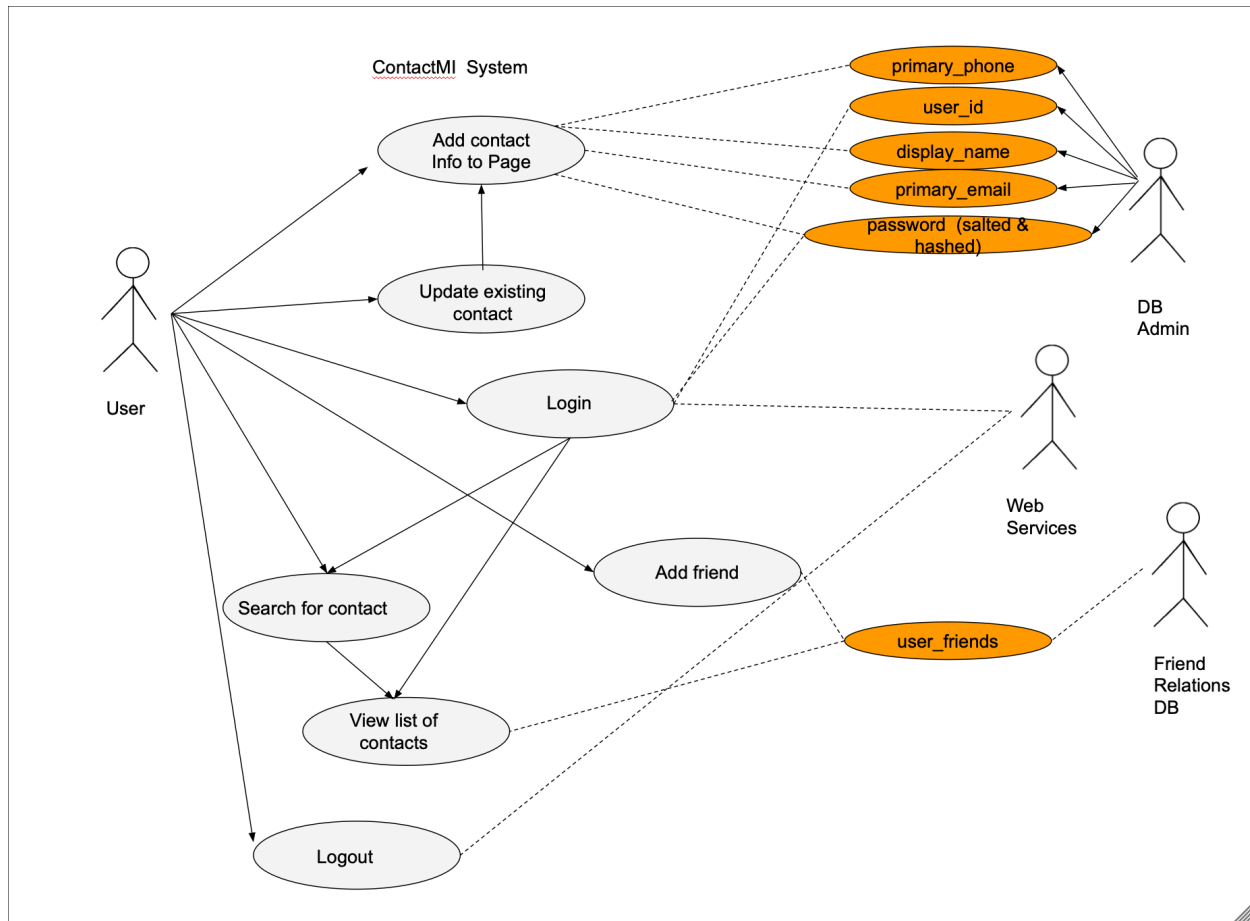

10. Meeting Plan

Team Meeting: Meeting on Mondays 1-3 PM in CSEL

Weekly TA meeting: Thursday 4:20-4:35
